We'll help you solve all the problems with planning your daily meals and impulsive purchase of unhealthy food.

 Join DENO family to get access to:

- Simple healthy meal planning
- Health and weight support
- Meals suggestions according to your weight goal
- Easy food search by location

We are offering you:

 Simple calories calculator to count the required number of calories and nutrition factors to keep your body health and beauty.

 Best recipes for delicious and balanced meals according to your body factors and your weight goal.

 Locations of stores near you to check the availability of the groceries you need for your daily healthy eating plan.

Are you a grocery provider?

 Become a DENO partner to get a chance to increase the number of your customers.

#DISABLEJUNKFOOD

Pushkar Adhikari, Enrico Gruner &
Silvio Endruhn

Challenge@HomeOffice

- no lunch break with colleagues
- only junk food every day
- no team events
- talking only about work on the telephone

Solution@HomeOffice

- live cooking event with colleagues
- one member of the team chooses recipe
- 2-3 days in advance the member shares the recipe so you can organize the ingredients
- one member shows how to cook the meal
- everybody should activate their video
- all members cook together and interact

Eating@HomeOffice

- after cooking you can have a virtual lunch break together
- you have time to talk about something different than work
- eating in groups with a maximum of 5 people might be useful

Have fun cooking and eating together!

THE PROBLEM

Working in the home office leads to less physical activity and social interaction. Employees just sit in front of their home PC and no longer walk to work, meetings, meals or the coffee kitchen.

TRY IT OUT

During the hack-at-home event we developed a testable demo, encouraging you to do sit-ups and pushups with your co-workers.

INVESTMENT OPPORTUNITES

We need 25.000 € to kickstart sports-with-me. In exchange we offer shares of our enterprise.

OUR SOLUTION

sports-with-me uses gamification to encourage users to engage in sports and share their experiences. The collective completion of challenges creates motivation and a feeling that is otherwise lost in the home office.

HOW IT WORKS

We use Meteor to build a fast and scaling application, offering multiple users and social interaction.

Virtual Cubicles

Why does home working suck?

- There is an extremely high communication overhead
- Where are the lunch talks and my social life?
- I cannot leave work at work anymore!

Our Solution:

- We mimic the real working environment
- We show the state of every employee so that we know when we can talk to our colleagues
- We have virtual coffees together!!!

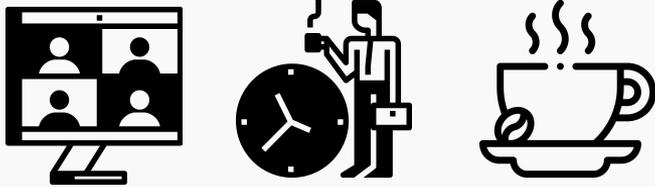

Problems of remote employees

- 73% miss socializing in person
- 37% miss having a daily routine
- no good coffee at home

Solution

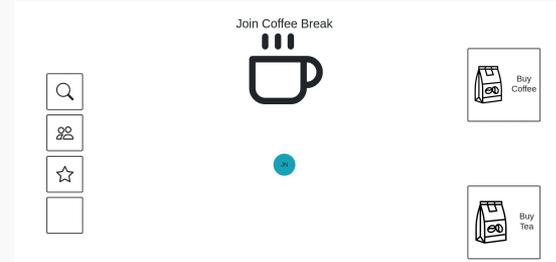

A platform where employees can meet for **coffee break**

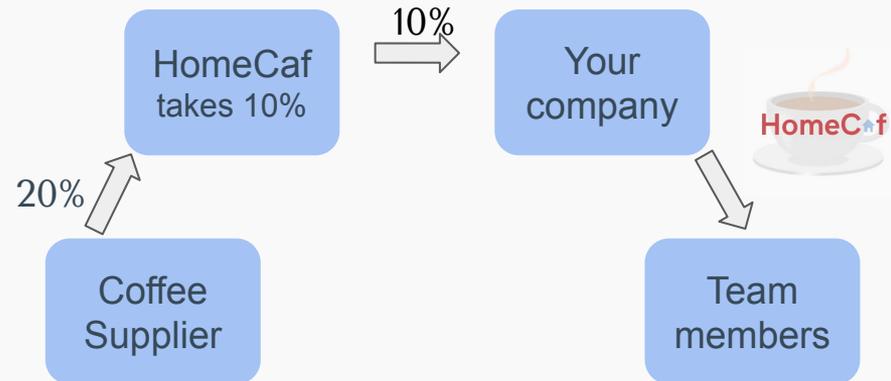

→ You got 10% off in our marketplace
→ send goodies to your employees for free
→ they meet at our platform

→ Happy employees
→ more productivity
→ mental health

Home Office Alexa

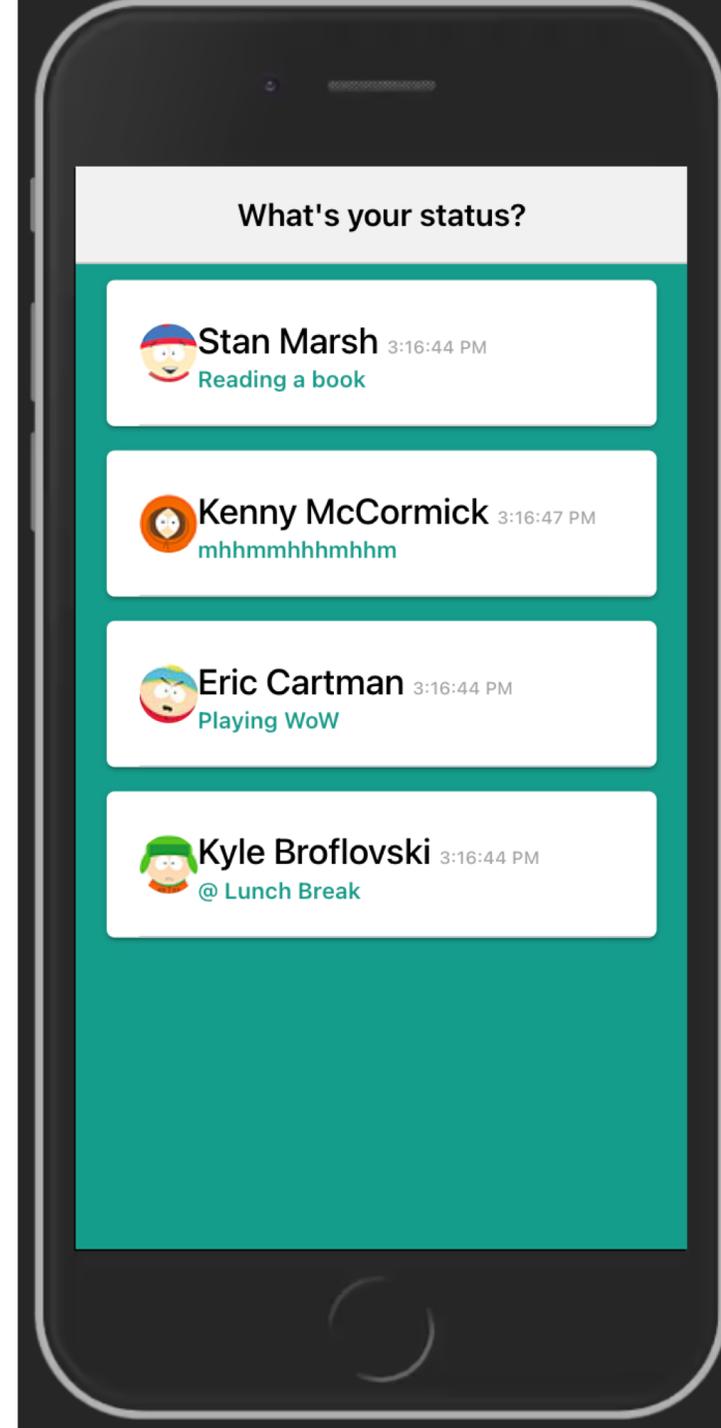

➤ When you start tracking time with Home Office Alexa you'll have real data that shows you exactly where your time goes so you can improve your productivity.

- Track hours using a timer
- Categorize time by project
- Visual time breakdown
- Customizable reports
- See who worked on what
- Share reports with others
- See current activity
- Appointment calendar
- Video conference
- Team chat

What's your status

What's Your Status -> An Angular Application which allows you to check the status of your team mates in your work space on Slack. The Slack Api sends you a list of your users and displays their current status. Like this you don't have to search each time in your slack workspace what each member is doing.

Possible feature: Socket.io for real-time updates when user changes status.
