Hack@Home: How to improve Working from Home?

EasyMeet

PROBLEM

Difficult to setup short notice meetings with high acceptance rate.

Several iterations among people (doodles) to find a good slot-> waste of time

This **doesn`t incentivize people** setting-up both work related and team event **meeting**.

SOLUTION: EasyMeet

A tool that supports the set-up of meetings - **maximizing the acceptance rate**.

EasyMeet checks the calendars of the people invited to the meeting and proposes some dates and time options that have the max acceptance rate at the earliest slot.
